PROJECTS

FlyerFresh.com — *Student Cleaning Service*

Think Uber for dirty dorm rooms and laundry. I wrote a static webpage with HTML and CSS that would allow any visitor to the website to submit a form with their name, phone number, what service they required, and their room number/address. We would receive the requests through an email and would sift through them manually to find valid requests.

Spin Shoot — *iOS Application*

A simple arcade game designed for iOS. Within a year, Spin Shoot tallied two thousand downloads across 23 countries.
